

A New Way to Experience Telecommunications

IEElement Delivers Affordable Business Solutions

IEElement's broadband business solutions are designed to give you the voice and data access you need, without breaking the bank. Choose the solution that is right for your business, and let us handle the rest. With IEElement, you'll experience faster, more secure service at an affordable price. The proof is in your wallet.

Dedicated Internet Access

Experience fast, affordable, secure and always on access, via IEElement's dedicated Internet access services. Support multiple users online simultaneously, and explore all of the Internet's most sophisticated web pages with a dedicated broadband connection.

Focus on your business' productivity and leave the network management to us. IEElement will manage, maintain and monitor your dedicated Internet connection twenty four hours a day, seven days a week.

IEElement Integrated Access DynamicWave Solution

How fast do you want to go? As one of the only providers offering "dynamic pipe" enabled services, IEElement's Integrated Access DynamicWave Solution offers customizable business solutions for your voice, data, and Internet needs at competitive prices.

DynamicWave Solution Packages Include:

- Multiple choices for Internet bandwidth
- Burstable, dynamic T1s that can deliver full 1.5 Mbps speed when phone lines are idle
- Customization to 24 local lines
- Customized bundled long distance minute packages
- Free caller ID
- Free call forwarding
- Free hunting

IEElement Layer 2 Private Network Solution

L2PN™ is IEElement's exclusive private network solution for companies that need secure connections to remote locations. Create secure, critical communication channels between your offices, partners, vendors, customers, and employees via L2PN™.

With IEElement's "network driven" L2PN™, you can share information between remote locations without excessive capital expenditures, high software costs or the high risk of traditional remote access/virtual private network (VPN) methods.

Enhance communication and share virtually everything on your desktops and servers between your headquarters and remote locations, including:

- Files, spreadsheets and other critical documents
- Large database applications
- Information, accounting, proprietary systems
