

A New Way to Experience Telecommunications

DynamicWave Solution Packages Include:

Unique and Specialized Integrated Access

IEElement's integrated access DynamicWave Solution offers consolidated voice and data services over a dedicated T1. Reap the benefits of having fast, reliable, and customized service via our unique and specialized "dynamic pipe" technology.

"Dynamic pipe" technology allows IEElement to offer businesses the ability to utilize the excess bandwidth not being used by idle phone lines, to burst Internet access speed all the way up to 1.5 Mbps. IEElement is proud to be one of the only service providers offering the "dynamic pipe" enabled Internet technology.

DynamicWave Solution

Packages	Phone Lines	Internet Speeds Up To
DynamicWave Silver	8	512 K
DynamicWave Gold	12	768 K
DynamicWave Platinum	16	1.5 Mbps

IEElement utilizes a state of the art, MPLS-enabled, fully redundant, and fully scalable, coast-to-coast fiber optic network. IEElement's services come with a 99% uptime guarantee as well as the highest Quality of Service (QoS) standards available today.

Dynamic Pipe Enabled Internet Service

- Always-On dynamic allocation
- Dedicated T1 service
- 10 POP email accounts
- 25 Mbps web hosting
- 95% committed information rate
- 99% service level guaranteed

Local Phone Service

- 8 to 24 lines
- Additional local lines available
- Service options
- Standard analog business lines

Long Distance Service

- Choice of minutes to bundle in
- Domestic and international long distance
- Domestic toll free

Why waste bandwidth? IEElement's "dynamic pipe" enabled integrated access DynamicWave Solution is scalable, makes good business sense and is unique to other service provider's offerings.

Why IEElement?

Lower Cost

Receive the most sought after services available at the most competitive price.

Greater Bandwidth

Burst your Internet speed by using idle phone line capacity more efficiently with "dynamic pipe" enabled access.

Hassle Free Technology

Works with your current phone system and forget about new equipment costs and special installation requirements.

Reliable

Experience maximum network reliability and always-on service while IEElement monitors, manages, and maintains your service, 24 hours a day, seven days a week.

IElement Integrated Services

IElement Integrated Services
FLEXIBLE

One IElement DynamicWave T1 Connection

Other Service Provider Offering

Other Service Provider Offering
FIXED

Voice Connection | Data Connection

IElement's application of the flexible dynamic pipe technology is simple: less traffic, faster service. Like the varied speed of a car during the day depending on the flow of traffic, your Internet speed will fluctuate accordingly when multiple users are on the phone and when they're not. When you subscribe to IElement's integrated access DynamicWave Solution, you open the door to the Internet highway.

Other Service Providers: Two separate connections for voice and data = Fixed service wasting bandwidth.
IElement: One integrated dynamic T1 connection = Flexible service utilizing available bandwidth.
